## TELEGRAPHIC MESSAGES.

[FROM OUR CORRESPONDENTS.]

BRAIDWOOD.

Wednesday evening.

AN OUTLAW SHOT.

AFTER the bushrangers left Morris's store, which they robbed of money and various articles, the police pursued and came upon them, camped near Sydney Creek. A skirmish took place, and several shots were exchanged. When Patrick Connell got on his horse to escape, constable Kelly fired at him with a revolver, and the shot struck Connell in the head, killing him instantly. Four of the bushrangers managed to escape on foot into the scrub, one of whom is supposed to be wounded. Clarke was not there, but Connell fought desperately. The police took possession of the saddle, &c., and brought Connell's body into town for post-mortem examination. In all these objects the artist has been very successful in his imitation of the natural objects introduced.

MAGIC PHOTOGRAPHS.—A few days ago a paragraph appeared in this journal respecting these wonderful photographs, and it was written by Mr. Lemaire, of the London and Paris Bazaar, George-street. Two envelopes contain slips about the size of a carte-de-visite; the slip in one envelope has the appearance of disengaged albumenized paper, those in the other like thin skinning-flesh. The piece of paper in envelope No. 1 is a plate, glazed side upward, then lay the sheet of paper in envelope No. 2 on the top, moisten this with water, and in less than a minute the photograph will be produced. We have seen the experiment, and the result is the production of a very pretty picture, such as has been described in this paragraph above alluded to.

**THE ATTACK ON DR. GREENUP.**—Our Paramatta correspondent states that Dr. Greenup had last night paid a resolute visit to the British Consul, and obtained a favourable pass, which, however, is considered rather a favourable omen than otherwise. The friends of this much respected gentleman will be glad to hear that up to the present time no inflammatory indications have appeared, and hopes are entertained that the unhappy event will not prove a final calamity. The Consul, it is said, will continue to cause much anxiety. It appears that the scissars with which the blow was dealt were so fastened as to leave the blades about the tenth of an inch open, thus inflicting a most serious wound. The perpetrator of the deed is still at large, to say nothing of the fact that he who would serve some one else the same. The conference took place not in the cell as stated, but in the yard of the criminal lunatic wing.

**THE PROSPECT OF WAR.**—The *Bendigo Advertiser* of Saturday, 14th inst., states that the news of the battle of Solferino, recently placed at our disposal some interesting particulars, contained in the private letters, with regard to the war excitement in Germany. Hanover, appears, has called out all her reserves, and sent her troops and crown ducats to the war. Vienna, the modesty of the terms with which they can be sent, and should be forwarded to England. It is anticipated that she should be proclaimed, the Habsburgian troops will be at once marched to St. Gall, to be near the sea, and in communication with the Austrian forces in Holstein, Saxony, also, according to the terms of the alliance, the war will be waged more vigorously than ever. The smaller fortresses of Konigstein not being strong enough. The smallest, as well as the most powerful of the German States, are alleged to have called out every available soldier, and the total force now in arms is given as four million.

The news of the war in Germany has been punctuated by the fact that the pay of her troops amounts to 500,000 thalers a day (a thaler is three shillings). It is not surprising, therefore, to learn that she has sought a loan from Rothchild, and been refused it. Should war break out, it is anticipated that the forces of the first of the two great powers will be equal to the task.

The small, as well as the most powerful of the German States, are alleged to have called out every available soldier, and the total force now in arms is given as four million.

The news of the war in Germany has been punctuated by the fact that the pay of her troops amounts to 500,000 thalers a day (a thaler is three shillings).

It is not surprising, therefore, to learn that she has sought a loan from Rothchild, and been refused it. Should war break out, it is anticipated that the forces of the first of the two great powers will be equal to the task.

It is anticipated that she should be proclaimed, the war will be waged more vigorously than ever. The smaller fortresses of Konigstein not being strong enough.

**A GOOD FAMILY MEDICINE** CHRIST, with a product now, has never had a life, and yet we think the idea might be improved upon and made more simple form. Take some good compound, such as COCKLE'S ANTIBILIOUS PILLS, and we find that weight, or some mysterious compartment, and enchanted bottles with crystal stoppers. Other might be used, but COCKLE'S PILLS, as tested by many thousands of persons and found to answer their purpose so well, may be used at the best.—*Observer*.

**COCKLE'S ANTIBILIOUS PILLS.**—SYDNEY.

**EPPS'S HOMEOPATHIC COCOA.**—Homeopathic Practitioners, and the medical profession generally recommend COCOA as being the most healthful of all beverages. When the doctrine of homoeopathy was first introduced into England, there were to be obtained no preparation of cocoa so attractive to the taste as susceptible to the action of the homoeopathic principle. In the crude state, or so unskillfully manufactured as to obtain little notice, J. EPPS, of London, homoeopathic chemist, was induced, in the year 1839, to turn his attention to this subject, and at length succeeded, with the assistance of Dr. H. C. T. Dyer, in being the first to introduce an article pure in its composition, and confirmed by the perfect trituration it receives in the process it passes through, as to be most acceptable to the delicate stomach.

**BREAKFAST BEVERAGE.**

For general use, EPPS'S COCOA is distinguished as invigorating, nutritious, and containing no irritating or astringent properties. Dr. H. C. T. Dyer, in his work "Food, and its Astringents," says:—"Cocoa contains a great variety of important nutritive principles—every ingredient necessary to the growth and sustenance of the body." Again, "As a nutritive, Cocoa holds very much higher than either Coffee or Tea."—Dr. Dyer.—Two measures of the powder for breakfast cup, filled up with boiling water or milk. The kind, 1-lb., 4-lb., and 1-lb. Packets. Sold by Grocers, Confectioners, and Chemists. Each Packet is labelled J. EPPS, Homeopathic Chemist, 112, Great Russell-street, and 244, Strand, London—*the Medicine-store: Manufacturey*, 304, Boston-road, London.
